T3 Dialer - Headset Telephone for Offices and Call Centers. Full range of headsets to choose from.

T3 Dialer Headset Telephone

HEADSET TELEPHONE COMPLETE SOLUTION.

Accutone® is proud to introduce the perfect headset solution for small offices and call centers - **T3 Dialer** Headset Telephone. A simple yet durable design, T3 is basically a telephone terminal designed to pair with a headset instead of a handset. Powered by AMS IC chipset, T3 provides high-quality voice reception as well as automatic line-loss compensation. Other features include ASP protection, 3-levels flash selection, LED-indication, mute and vol controls.

T3 is compatible with a wide variety of Accutone® telephone headsets, which are considered the most comprehensive selections in the industry, in terms of feature, reliability and audio quality. Equipped with speech-enhanced receiver and noise-cancelling microphone, pairing our headset with T3 greatly improves the quality of your telephone conversations, on top of handsfree convenience.

T3 Dialer headset telephone directly connects to any standard PSTN wall-jack.

T3 - Features Overview

Convenience	One-stop solution with telephone unit and headset
Dialpad	Soft rubber keys with flash, mute and redial features
Acoustics	Top end sound performance using AMS IC chipset
Ease of Mind	LED indications for on-line and mute status
Noise-Cancelling	Perfect product for high-traffic noisy environments
Reliability	Automatic line-loss compensation to avoid drop calls
Durable	Strong mechanical structure designed for rough usage
